THE REPLY FILED <u>07 November 2008</u> FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.

1. ☒ The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods:

   a) ☐ The period for reply expires _____months from the mailing date of the final rejection.

   b) ☒ The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.

       Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

<u>NOTICE OF APPEAL</u>

2. ☐ The Notice of Appeal was filed on _____. A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a).

<u>AMENDMENTS</u>

3. ☐ The proposed amendment(s) filed after a final rejection, but prior to the date of filing a brief, will <u>not</u> be entered because

   (a)☐ They raise new issues that would require further consideration and/or search (see NOTE below);

   (b)☐ They raise the issue of new matter (see NOTE below);

   (c)☐ They are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or

   (d)☐ They present additional claims without canceling a corresponding number of finally rejected claims.

       NOTE: _____. (See 37 CFR 1.116 and 41.33(a)).

4. ☐ The amendments are not in compliance with 37 CFR 1.121. See attached Notice of Non-Compliant Amendment (PTOL-324).

5. ☐ Applicant's reply has overcome the following rejection(s): _____.

6. ☐ Newly proposed or amended claim(s) _____ would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).

7. ☒ For purposes of appeal, the proposed amendment(s): a) ☐ will not be entered, or b) ☒ will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended.

   The status of the claim(s) is (or will be) as follows:

   Claim(s) allowed: _____.

   Claim(s) objected to: _____.

   Claim(s) rejected: *1-2 and 11-14*.

Primary Examiner, Art Unit 2457

Continuation of 11. does NOT place the application in condition for allowance because: Applicant alleges that a service contents managing section for managing a plurality of service contents to be provided to a client terminal of a vehicle, wherein the service contents managing section includes a cache identifier providing section for data cache stored duration time in the client terminal, wherein the client terminal uses the server, and a cache state managing section for managing the data cache stored duration time of the service content is provided from the server according to the cache identifier assigned to the service content is not disclosed. The examiner disagrees with the applicant as Jacobs clearly discloses what the applicant alleges in col. 7, col. 8, and col. 9. In col. 7, lines 42-44, Jacobs discloses that the cache system is configured to examine a data request for specified information, such as a session identifier which holds the expiration of a session. In col. 7, lines 60-67, col. 8, lines 1-5, Jacobs discloses that the service of the data item is restricted or limited to registered session or requests that include session identifiers. In col. 9, lines 14-15, Jacobs discloses that session expiration can be reset by the origin server which indicates that origin server controls the session identifier which contains the session expiration. The data item includes a session identifier (originated by the origin server) which restricts the data item which means once the session expires (indicated by the session identifier), the cache system that cached the data item no longer have the data item. In other words, when the session identification determines that a session is expired, the cache system that contains the data item is no longer available due to the sessions expired time. This means the session identifier determines how long the cache system has to store the data item temporarily before it is no longer available. This concludes that Jacobs discloses applicant's identifier that provides the client terminal a cache identifier which indicates a data cache stored duration time, wherein the client terminal uses the server, and a cache state managing section for managing the data cache stored duration time of the service content is provided from the server according to the cache identifier assigned to the service content.
